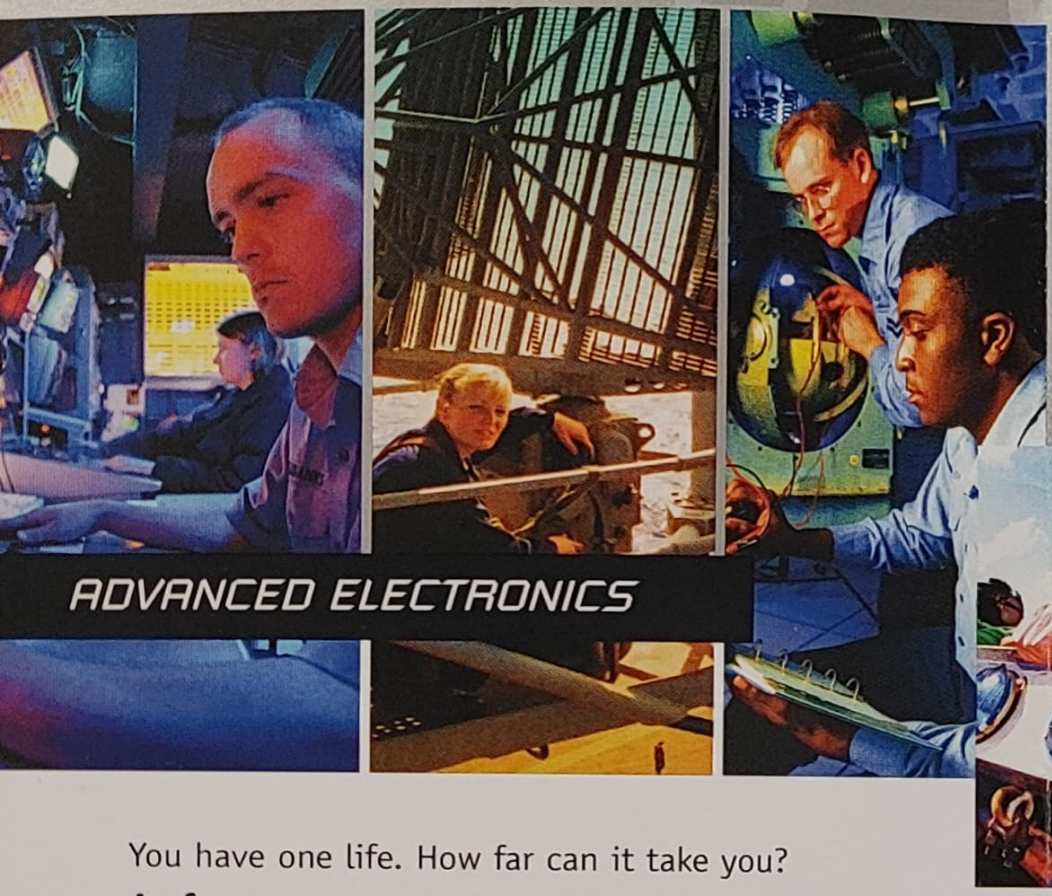
NAVY ADVANCED PROGRAMS

Navy Advanced Programs: We want you for your mind. And we're willing to pay for it.

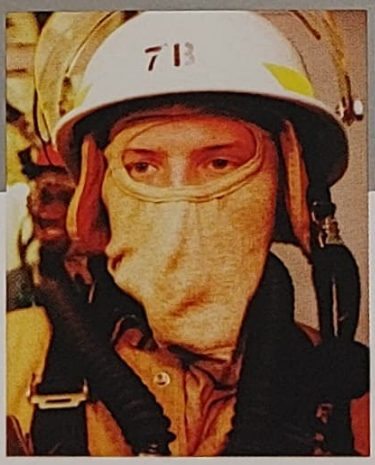


You have one life. How far can it take you? **As far as you want to go.** Navy Advanced Programs. They're not for everyone. Frankly, we don't take everyone – only certain individuals with special qualifications. Pride. Intelligence. Integrity. And guts.

Qualify, and your **career potential** in and out of the Navy will be limited only by your ambition. Advanced Programs requires up to two years of Navy training and delivers four years of immediate hands-on experience.

In Navy Advanced Programs, you'll **do more in six short years than most do in a lifetime.**

Two-thirds of the world is underwater. So much for having to achieve your potential from a 6' x 8' cubicle.



Brace yourself: Each advanced program is **far from ordinary**. Far from what your friends are probably doing. And far more meaningful.

Getting a life and getting an education don't have to be mutually exclusive. You tend to learn more when you do it, rather than hear about it. You tend to learn more when the lives of co-workers depend on your skills. You tend to learn more when your teacher weighs 97,000 tons. *There's a lot to be said for having a nuclear aircraft carrier as a teacher.* Not the least of which is that in two years of **hands-on, adrenaline-pumping training,** you'll not only have the adventure of a lifetime, you'll be just credits away from an associate's degree. **All while getting paid.**

Do more than amaze your friends. Amaze the world.

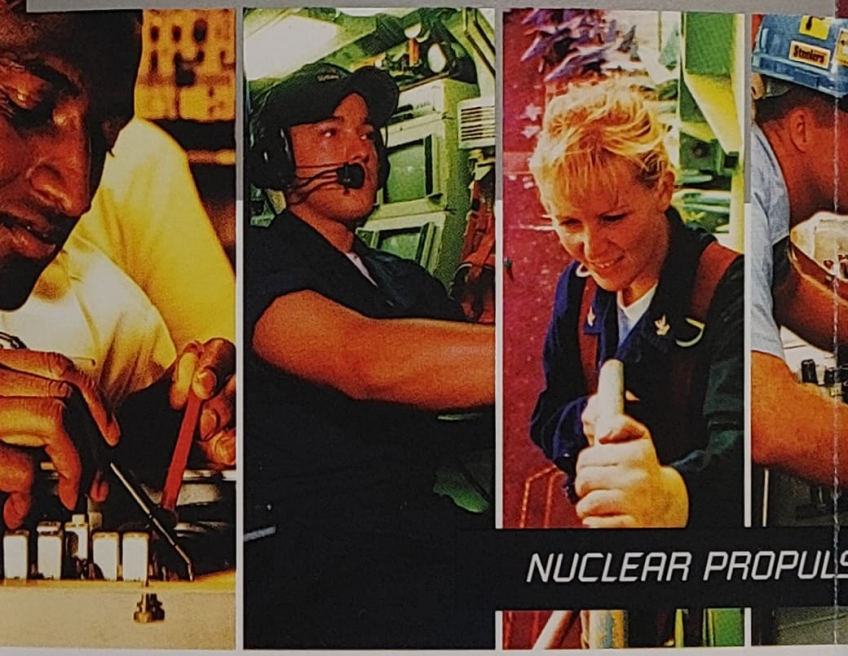
Navy Advanced Programs careers take you **around the world**. Using equipment most people could never dream of. From working on nuclear reactors to decoding encrypted foreign communications. Where do you see yourself? Check out the possibilities...

ADVANCED ELECTRONICS

Underwater surveillance. Search-and-rescue operations. Assembling and maintaining nuclear-capable ballistic missiles. In advanced electronics, **adventure, intrigue and saving the world** are all in a day's work.

ADVANCED ELECTRONICS/COMPUTER

What makes the Navy the world's strongest? **America's smartest.** Qualify for this program and you'll maintain aircraft carrier computer systems... repair control mechanisms for advanced weapons firing systems...check communications systems. And your day will just be getting started.



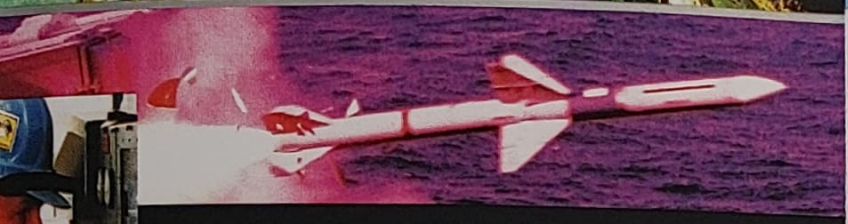
ADVANCED TECHNICAL

Get behind the inner workings of **the most powerful warships on earth.** Maintain the Navy's most advanced propulsion systems and gas turbine engines. Analyze foreign communications data. Keep the world's strongest fleet moving. And thrive on the bottomless supply of adventure.

GRAMS

NUCLEAR PROPULSION

Nuclear power. One of the world's most coveted fields. This advanced program puts you at the forefront with an education at one of the toughest and most prestigious schools in the nation. Work on nuclear reactors...from the U.S. to Australia, Thailand and beyond. Gain a comprehensive understanding of a pressurized-water Naval nuclear power plant,



ADVANCED ELECTRONICS/COMPUTER

including reactor-core nuclear principles, heat transfer and fluid flow, plant chemistry and materials, mechanical and electrical systems and radiological control. Gain experience that not only propels submarines and aircraft carriers...it propels your career. In the Navy. And beyond.
